

HMR Supplies Overcomes Material Handling Challenges

HMR Supplies helps companies around the world handle huge, heavy, difficult items safely while increasing manufacturing process flexibility and efficiency. The ability to move heavy loads and fit in a wide variety of locations - both inside and outside your facilities - is what sets HMR Supplies equipment apart in the heavy material handling industry. Whether you need a self-propelled or towed solution (or one that can be either), your HMR Supplies equipment comes standard with industry-leading flexibility and adaptability in creating modular assembly lines. So when your needs and process inevitably change, your HMR equipment will be able to adapt to the new way of doing things.

No matter what you have to move and where you have to move it, HMR Supplies has the expertise to design and fabricate a system to get it done.

GET MORE EFFICIENT USE FROM ALL YOUR EQUIPMENT

HMR Supplies has helped customers become more efficient by providing the most cost-effective tool to accomplish heavy material handling tasks. Rather than have a backlog of projects waiting to use your larger self-propelled modular transporter (SPMTs), use a smaller 3 or 4 axle SPMT customized to your project needs. Our self-loading and un-loading transporters can be adapted to mesh with a variety of products with the lowest load-out height in the industry. HMR Supplies can develop a solution that will keep all of your projects moving.

Creating Solutions. Solving Problems.

HMR Supplies is People who Find Solutions

Our ability to manufacture and deliver high-capacity, durable and efficient heavy material transport equipment is only part of what HMR Supplies does for its customers.

What really sets us apart is the way HMR Supplies combines our existing products with employee ingenuity, expertise and full design-and-build capabilities to become our customers' valued partners, helping them understand and overcome challenges.

We start by listening and learning about what you want to achieve. We then help envision the best solution to that problem, and finally find the ideal combination of products and processes that make the vision a reality. The solution could include any combination of an existing HMR Supplies product, an existing product that's uniquely customized or an entirely new piece of equipment.

No matter what it takes, HMR Supplies is committed to helping customers design and execute plans to handle and transport huge, heavy, awkward items safely and as cost-effectively as possible.

Contact HMR Supplies today and start the conversation about overcoming whatever challenges you face.

A HERITAGE OF HEAVY LIFTING

HMR Supplies traces its roots in heavy transport back to 1968, and we've been manufacturing the industry-leading Holland Dollie since 1981. That's more than four decades of experience serving structural movers, heavy haulers, large construction, large product manufacturers and the oil field, cement, marine and wind industries.

Creating Solutions. Solving Problems.
